Experience

Document Digitisation Assistant (Timvikarie) — *If P&C Insurance*, Gothenburg, Sweden

MARCH 2025 – JULY 2025

Scanned and digitised insurance claim documents, imported files into the Fronten system, and recorded case data in Excel while working independently with a high level of accuracy.

Freelance Web Designer/Developer — Gothenburg, Sweden

JANUARY 2025 – PRESENT

Developing a custom portfolio website tailored to the client's specifications and preferences. This includes implementing responsive design and modern UI to enhance user experience and build a functional, visually appealing website.

Kickoff Coordinator — *Göta Studentkår*, Gothenburg, Sweden

MAY 2022 – SEPTEMBER 2022

Created visual assets and promotional content to engage 100+ new students in event campaigns of a 3-week kick-off within the Software Engineering and Management University program at Gothenburg University. Managed and coordinated logistics and planning, including overseeing a team, collaborating with external companies and other student unions, and ensuring cost-effective event activities within budget.

Marketing Assistant — *The Embassea*, Mallorca, Spain

FEBRUARY 2019 – JUNE 2019

Created branded graphics and layouts for social media, aligning social media visuals with brand aesthetics to boost engagement.

Education

Gothenburg University, Sweden — *Software Engineering & Management Bachelor's*

AUGUST 2021 – JUNE 2024

Bachelor's thesis: *Application of Large Language Models in the UI Design Process* – This qualitative study investigated effective ways, current limitations and the future of using large language models (LLMs) in the user interface (UI) design process.

Reykjavik University, Iceland — *Bachelor Erasmus Exchange Studies*

AUGUST 2023 – DECEMBER 2023

Projects

Music Streaming Web Application (Bemify) — *Front-end Developer*

- Designed and implemented a user-focused interface for a music streaming platform, enabling account management, playlist curation, and social features. Ensured responsiveness for seamless functionality across devices, enhancing user experience on both desktop and mobile.
- Technologies used: Figma, HTML, JavaScript, Node.js and Vue.js

Dentist Booking Platform (Dentistimo) — *Back-end Team*

- Built an intuitive appointment management system with an interactive map and user accounts. The web platform is designed to simplify booking dentist appointments in Gothenburg. It is built with a distributed backend architecture, utilising MQTT for communication between components, and follows a service-based structure.
- Technologies used: JavaScript, MongoDB, MQTT, Node.js and React
